

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method of monitoring employee online activity, comprising:
 - a) importing log files generated by a master system with information on ~~all~~ at least a portion of activity passing through a centrally located firewall to a database to generate master activity files, wherein the log files provide information on activities attempting to pass through the firewall from and to ~~a one or more~~ company computers, and wherein the master activity files include data on Internet usage, e-mail usage, and dial-in connections;
 - b) importing current employee and company organizational structure information to the database;
 - c) producing electronic summary reports on employee on-line activity using the master activity files and the current employee and organizational structure information; and
 - d) providing the electronic summary reports to a first employees in response to a request for the first employee's information from the first employee, wherein the summary reports include information on the first employee as well as all other employees working under the first employee in the company organizational structure.

2. (Original) The method of claim 1, further including highlighting information in the electronic summary reports that indicate high usage activity relative to usage information for all other employees of the company.

3. (Original) The method of claim 1, further including providing links in the summary reports which, upon selection, provide further detailed summary information relating to the information selected.

4. (Original) The method of claim 2, further including providing predetermined rolling time period for the summary reports.

5. (Original) The method of claim 3, further including providing dial-in/dial-out, browser request, in e-mail count and out e-mail counts for each of the employees listed in the summary report.

6. (Original) The method of claim 5, further including providing electronic links in the summary report that enables further details on the counts listed in the report to be displayed.

7. (Original) The method of claim 5, further including providing count information on dial-in/dial out activity for an employee by week in response to selection of a link in the summary report.

8. (Original) The method of claim 7, further including providing a further link in the weekly activity report that indicates a telephone number called and an amount of data transferred.

9. (Original) The method of claim 5, further including providing a weekly browser activity report in response to selection of a link in the summary report.

10. (Original) The method of claim 9, further including providing information on URL and amount of information transferred in response to selection of a link in the weekly browser activity report.

11. (Original) The method of claim 5, further including providing a e-mail count weekly report in response to selection of a link in the summary report.

12. (Original) The method of claim 11, further including providing information on the number of attachments, addresses and amount of information transferred in response to a link in the e-mail count weekly report.
